FE BUREAU New Delhi, August 27

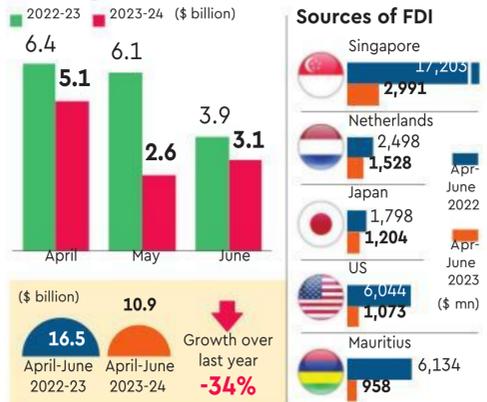

FOREIGN DIRECT INVESTMENT (FDI) inflows plunged 34% on first quarter of FY24 as overseas investments in the services sector, computer software fell sharply, according to government data.

Total FDI, which includes reinvested earnings and other capital in the June quarter, was down 21.3% on year to \$17.5 billion.

The inflows are slightly higher than \$9.2 billion received in the January-March quarter of the previous fiscal year. In Apr-June period of last year, it stood at \$16.6 billion. The year-on-year (y-o-y) decline in the monthly inflows has been visible since July 2022 and it was in this period that funding to startups registered a sharp drop. Funding winter — as the industry calls it — saw funds raised by start-ups decline to \$25 billion in calendar year 2022 from \$42 billion in 2021.

Services, computer software and hardware, and trading are the biggest recipients of FDI in India and a sharp drop was seen in these categories. Service sector, which includes financial, banking, and business out-

Oil export uptick helps refiners maintain high run rates

SUKALP SHARMA New Delhi, August 27

WITH DOMESTIC DEMAND for fuels and other petroleum products witnessing a slump due to the monsoon rains, India's refined products exports has witnessed an uptick, helping the country's refiners keep refinery runs high at a time when refining margins are robust globally, shows an analysis of data shared by commodity market analytics and intelligence firm Kpler.

The cumulative clean product exports from India in August have so far been the

highest since May 2022, with jet fuel exports at a historic high. In oil industry parlance, clean products refer to the class of petroleum products that are uncontaminated and not previously used in any application. Most major crude oil-based fuels like diesel, petrol, jet fuel, kerosene, and naphtha are categorised as clean products. Dirty refined products refer to the likes of fuel oil, low sulphur waxy residue, and carbon black feedstock.

So far in August, India's jet fuel exports have averaged at a record high of 242,382 barrels per day (bpd), Kpler data shows.

The previous peak of 206,871 bpd was in June 2018. Last

month, India's jet fuel exports were 198,968 bpd.

In June, which marked the onset of the southwest monsoon, jet fuel exports stood at a robust 183,661 bpd. As for cumulative clean products, India exported 1.29 million bpd in August, the highest since May last year when the export volumes stood at 1.32 million bpd, as per Kpler. In July and June, India's clean product exports were also strong at 1.21 million bpd and 1.20 million bpd, respectively.
